

Mouse IgG2a, κ Purified

Catalog #/ Size:	103601 / 100 μ g 103603 / 500 μ g
Conjugate:	No conjugation.
Clone:	RPC5.4
Isotype:	IgG2a, κ
Preparation:	Highly purified RPC5.4 immunoglobulin is prepared using affinity column chromatography.
Concentration:	0.5 mg/mL
Formulation:	PBS, pH7.2, <0.09% NaN ₃ and 0.2% (w/v) BSA.
Storage:	2-8°C. Do not freeze.
Applications:	Flow Cytometry and experiments that need purified IgG2a, κ as negative control.

Application Information

Each lot of purified RPC5.4 has been routinely validated with four serially diluted concentrations to determine any non-specific binding in human PBMCs by flow cytometric analysis. It is suggested to use the same concentration of purified RPC5.4 isotype control immunoglobulin as that of IgG2a, κ primary antibody.

Description

The RPC5.4 is a monoclonal immunoglobulin useful isotype control (negative control) for a comparative expression analysis including flow cytometry, immunoprecipitation, immunohistochemistry, and immunocytochemistry in both human and mouse experimental settings.
