

Mouse IgG2b, κ Purified

Catalog #/ Size:	102401 / 100 μ g 102403 / 500 μ g
Conjugate:	Purified
Clone:	MPC-11
Isotype:	IgG2b, κ
Preparation:	Highly purified MPC-11 immunoglobulin is prepared using affinity column chromatography.
Concentration:	0.5 mg/mL
Formulation:	PBS, pH7.2, <0.09% NaN ₃ and 0.2% (w/v) BSA.
Storage:	2-8°C. Do not freeze.
Applications:	Flow Cytometry and experiments that need purified IgG2b, κ as negative control.

Application Information

Each lot of MPC-11 has been routinely validated with four serially diluted concentrations to determine any non-specific binding in human PBMCs by flow cytometric analysis. It is suggested to use the same concentration of purified MPC-11 isotype control immunoglobulin as that of IgG2b, κ primary antibody.

Description

The MPC-11 is a monoclonal immunoglobulin useful isotype control (negative control) for a comparative expression analysis including flow cytometry, immunoprecipitation, immunohistochemistry, and immunocytochemistry in both human and mouse experimental settings.
